

Optical Products

Toslink-compatible cables and accessories

OCE

OCE Installation Cable

A lightweight moulded cable with a 2.2mm cable and moulded connectors for general purpose and installation use where small size is an advantage and the greater protection offered by the heavier types is not required.

OCA

OCA Patch Cable

An extremely durable patch cord with a tough 5 mm cable and moulded connectors for general purpose patching and interconnection.

OCB

OCB Patch Cable

A high quality patch cord with a 5 mm cable and heavy duty connectors. Recommended for use with the Signex Universal panel and Toslink module. The connectors have a solid metal shell with a very attractive haematite finish. The optical centre contact features a unique spring-loaded mechanism to ensure good contact between the mating optical surfaces helping to minimise insertion loss.

OCF

OCF Patch Cable

A professional grade patch cord with a 5 mm low-loss cable. Connector features all metal construction with anodised aluminium body and strain relief.

Standard lengths for all cable types: 0.6 m, 1.0 m, 2.0 m, 5.0 m, 10.0 m

Universal Panel Module

A back-to-back-coupler module for the Signex Universal Panel. Can also be used in any Neutrik 'D' series cutout.
